**Measuring Instructions:** <span style="color:red">**\* All measurements must be Fireplace Opening!**</span>

**1.** Decide whether fireplace enclosure will need to be **Overlap Mount** or **Inside Fit.**
    **A. Overlap Mount:** Most brick, marble, tile or any other smooth surface fireplaces, will allow a standard overlap mount. If an overlap mount is used on an uneven surface, two steps are needed to insure a good fit:
        **a.** Ask for **Maximum Overlap**. This will help cover any gaps caused by irregular stone.
        **b.** Ask for **Return Flanges**. These will go inside the opening and will also help to seal gaps. These will also give the installer something to pack mortar or insulation against.
    **B. Inside Fit:** Fireplaces that have irregular facing; field stone, river rock, or any other uneven surface, may require an inside fit, in which the fireplace enclosure will be mounted inside the opening.

**2.** Measure the fireplace opening and fill in the correct diagram.
    **Important:** When measuring the height, **always** make note of the lowest **and** highest point.
    *Example: If the lintel bar is lower than the brick, it is very important to inform Stoll of this. This will affect whether the fireplace door will mount correctly.*

**3.** Is the lintel lower than the fireplace face?
    ❒ No    ❒ Yes
    If yes, specify difference: _____

**4.** Is the hearth higher or lower than the fireplace floor?
    ❒ Same    ❒ Higher    ❒ Lower
    If higher or lower, specify difference: _____

**Additional Notes:**

**Rectangular Opening:**

**Arch Opening:** (Use this diagram or a template)

**Corner Fireplace:**
Facing the large side, where is the corner?    ❒ Right    ❒ Left
Diameter of support pipe/tube: _____
Distance from support pipe/tube to front edge of face:
  large side:  Top _____  Bottom _____
  small side:  Top _____  Bottom _____
