ETL Order No. 64501-203  
Letter Report No. 520764

SUBJECT: Approval of Fireplace Model Number C-30 as Vented Decorative Fireplace.

Dear Dick:

We have conducted a joint review with CGA of CFM Inc., gas fired fireplace model HE-30 and find that it meets the requirements of the ANSI Standard for Vented Decorative Gas Appliances Z21.50. Your Model C-30 is identical to the Model HE-30 and meets the same requirements of the above standard and is approved for use with natural and propane gas.

We expect the listing report to be released in the next few weeks and forwarded to you. In the meantime you are authorized to apply the ETL label to your Model C-30.

As we have discussed, if, in the future you wish to meet the requirements of ANSI Z21.49 we will list the C-30 as a gas fired gravity vented wall furnace and release a report reflecting the C-30 as being approved to that category.

If you have any questions, please contact me at anytime. As always we appreciate your business and look forward to being of continued service to you.

Best Regards;

Peary L. Tompkins  
Project Engineer
